Access your addresses

Over the web

tbd

Over the mobile phone

tbd

Over the database interface

tbd

Over e-Mail

tbd, coming soon

Manage your addresses

Search an address

Just type the name or address in the field on the first page.

Select the group concerned, if you know wish to select people out of a group.

Add an address

With the web interface

tbd

With the E-Mail interface

Tbd, coming soon

With your mobile phone

Install the „ActiveSync“ support as described in chapter xxx.

Edit an address

With the web interface

With your mobile phone

Import / Export addresses

Install your addressbook

Minimal installation

- 1) Download from sourceforge
- 2a) Extract „addressbook.sql“
- 2b) Apply to your database (e.g. with phpmyadmin)
- 3a) Upload all files to your website, e.g. to „yourdomain.com/addressbook“
- 3b) Edit the « config/cfg.db.php » according to your providers information.

```
$dbname      = "test";  
$dbserver    = "localhost";  
$dbuser      = "root";  
$dbpass      = "";
```

Additionnal security

Setup Users

- 1) Edit « config/cfg.user.php »
- 2) Add yourself as a « root » user

```
$userlist['admin']['pass'] = "secret";  
$userlist['admin']['role'] = "root"; // used to call "/diag.php"
```

- 3) Add somebody else as a global editor

```
$userlist['somebody']['pass'] = "secret-too";
```

- 4) Add « view » as a « readonly » user

```
$userlist['admin']['pass'] = "secret";  
$userlist['admin']['role'] = "readonly";
```

Setup read-only IP-Ranges

- 1) Edit « config/cfg.user.php »
- 2) Add your company's IP-range (or Proxy IP-addresses) as editors

```
$iplist['169.168.1.*']['role'] = "editor";
```

- 3) OR just add your company « read only »

```
$iplist['169.168.1.*']['role'] = "readonly";
```

Setup users in database

You may manage your users in the database too :

```
$usertable = 'user';
```

Notice : This is not an officially supported feature, as there are not yet any tools available. If you use it, just don't forget to encode the password mit MD5.

Additional integrations

iPhone / Android integration

1. Copy the content of « .htaccess_for_mobile_sync » to your «.htaccess»
2. You may change the path to your addressbook

```
Options +FollowSymlinks
RewriteEngine on
RewriteBase /

RewriteRule .* - [E=HTTP_MS_ASPROTOCOLVERSION:%{HTTP:Ms-Asprotocolversion}]
RewriteRule .* - [E=HTTP_X_MS_POLICYKEY:%{HTTP:X-Ms-Policykey}]
RewriteRule .* - [E=HTTP_AUTHORIZATION:%{HTTP:Authorization}]

RewriteRule ^Microsoft-Server-ActiveSync(.*)$ addressbook/z-push/index.php?%{QUERY_STRING}
```

Google Maps integration

Facebook / Twitter / Google integration

Tbd, coming soon.

Improve the addressbook

Fix your language

Got to the « include » directory and search your translation.xx.php. If you have any questions, feel free to post it to the forum.

Fix your address guess

Fix your layout

Add your feature

If you have any good contribution, feel free to post it to the forum.
